Fullstack Web Developer with 10+ years of experience in frontend development, CMS projects, and web applications, now focused on building modern full-stack solutions with React, Python/FastAPI, Node.js, and automated testing.

Experience

Webeet.io

Mar 2026 - May 2026

Software Engineer Intern

Remote

- Engineered a Python/FastAPI repository analysis tool with async job handling, structured API endpoints, and robust error handling, improving reliability for long-running analysis tasks
- Developed a structured, testable system using Pydantic schemas, clean component boundaries, and automated tests
- Proactively identified technical risks and delivered maintainable fixes

Flaschenpost SE

Nov 2023 - Oct 2024

Warehouse Clerk and Quality Specialist

Hamburg, Germany

- Processed high-volume orders orders for beverages and groceries for delivery and handled cancellations and returns
- Ensured the quality of fruits, vegetables, and other foods through inspections 2 times a day, enhancing customer satisfaction
- Managed 5-7 deliveries of incoming goods daily and handled the associated paperwork, ensuring smooth processes

Schmidt-Ohm + Partner

Sep 2022 - Feb 2023

Frontend Developer

Hamburg, Germany

- Developed pixel-perfect, CMS-ready HTML templates from Adobe XD designs, reducing front-end integration time
- Expanded 5+ client websites with new features that improved usability and boosted customer satisfaction
- Collaborated with cross-functional teams (backend and creative) on 5+ major projects, ensuring on-time delivery and high-quality outcomes

Lichtblick SE

May 2016 - Jan 2021

Frontend Developer

Hamburg, Germany

- Developed and maintained responsive frontend features for customer-facing websites, collaborating with backend and marketing teams to improve usability, performance, and lead conversion
- Engineered and managed 5+ sales-oriented partner websites, using Google Analytics to optimize performance and increase lead conversion
- Executed A/B email campaigns, boosting customer retention by 12%, while supporting critical C#.NET applications to ensure seamless operations

Ecompetenzcenter GbR

May 2014 - Apr 2016

Frontend Developer

Bremen, Germany

- Delivered and launched JTL Shop 3, Joomla & TYPO3 websites for 10+ clients, boosting online performance
- Consulted and supported customers, resolving 100+ requests with 90%+ satisfaction

Recommendations

Letter of Recommendation
webeet.io
May 2026
[Document Link](#)

Education

Masterschool **Mar 2025 - May 2026**
Software Engineering **Training Program**

- Acquiring hands-on experience through an immersive program, developing full-stack applications using JavaScript, React, Node.js, and SQL
- Applying software engineering principles such as object-oriented programming (OOP), test-driven development (TDD), and version control (Git, GitHub) in real-world projects
- Building and deploying scalable applications using RESTful APIs, cloud services, and CI/CD pipelines, improving system performance and maintainability

Schulzentrum UT-Bremen **Sep 2012 - Aug 2013**
Information Technology **Vocational Technical Diploma**

Die Informationsgesellschaft mbH **Sep 2008 - Jan 2012**
IT Specialist Application Development **Apprenticeship**

- Learned fundamentals of OOP with Java and developed websites with HTML, CSS, JavaScript, and PHP
- Developed mobile solutions with jQuery Mobile, PHP, and XML
- Installed and configured mobile devices for our digital museum guide "xpedeo"

Projects

Compass **Apr 2026 - Present**
[GitHub Repository](#)

- Continued contributing to an open-source repository analysis tool after the internship, improving test coverage, API structure, and structured output for more reliable codebase analysis

FlowVid **Sep 2025 - Present**

- Engineered a full-stack video streaming platform using React/Vite for the frontend and Python/Flask for backend API endpoints, including structured routing and repository separation
- [Backend Repository](#)
- [Frontend Repository](#)

Wikifeud - Hackathon@Masterschool **May 2025**
[GitHub Repository](#)

- Developed an interactive CLI-Based game using the Wikipedia-API and Python
- Collaborated strongly with my team
- Communicated issues early on with the team and the mentor
- Managed time efficiently (3 days to build the MVP)
